

Fall STEM CLUB

Grades 4-7

What: The STEM club will explore science through Lego Education, promoting creative problem-solving like engineers. Students will collaborate in small teams to foster teamwork and cover subjects including robotics, coding, architecture, simple machines, and Makers projects. This hands-on approach makes STEM engaging and can inspire a lifelong interest in science and technology.

When: STEM club will meet once a week after school from **3-4:15pm** dates are listed below. Availability and space are limited.

Grades: 4-7th

Cost: There will be a **\$225.00 fee per student**. A link to pay will be sent after sign ups are full.

Educator: Robin Marsh. A 20 year Lego STEM Educator and a FIRST Senior Mentor with FIRST Robotics.

At First Baptist Academy, STEM Club is a unique opportunity for students to grow in their thinking and see the world as God's special design, following Johann Kepler's idea of "**thinking God's thoughts after Him.**" To join, students should exhibit curiosity, obedience, self-control, and a genuine interest in science, technology, engineering, and math. Active participation is expected, as it's not a time for leisure. Students who disregard instructor requests or show a lack of engagement may risk losing their spot. If any concerns arise, the STEM instructor will contact parents, and a behavior contract will be provided on the first day of the club, requiring a signed return within a week.
